

Animal Enclosure Monitoring

Keep your animals safe by monitoring the environment of enclosures at farms, stables, kennels, and zoos.

Monitor temperature and humidity of enclosures during weather extremes.

Ensure adequate water supplies.

Be assured that gates are closed.

Use K, J, T, N, S, E, B and R-Type thermocouples connected directly to the ORB-X1.

Connect an optional humidity sensor to the 4-20mA or voltage inputs on the ORB-X1.

Monitor water levels with a level switch connected to an input on the ORB-X1.

Connect door switches directly to the ORB-X1 level inputs.
